

# ABC CREATE @ Riverview

## littleBits Training

Wednesday, February 6, 2019

Riverview School District:  
Riverview Jr. Sr. High School , STEAM Lab (off the Library)  
100 Hulton Rd. Oakmont, PA. 15139  
Arrival: 8 AM Ends: 3 PM  
Eligible for ACT 48 credits  
**Lunch will be provided!**

**No experience necessary!** This littleBits training session will introduce classroom teachers to this versatile tool designed to introduce coding into any classroom. This easy to teach and easy to learn resource engages students through making and game design and is available for classroom use through the ABC CREATE Lending Library.

Session designed for teachers of grades 3–12 (all subject areas) although all teachers are welcome to come and experience the possibilities. While easy to use with younger students, littleBits are versatile enough to be integrated into older grades as well. Presented by teacher and ABC CREATE Fellow Cathy Favo, this workshop will offer hands-on experience with the littleBits coding kits and connect teachers across local districts to collaborate in planning and implementing lessons.

### What to Expect

- Gain an understanding of Coding and its place in STEM education.
- Become familiar with littleBits pieces and parts.
- Explore on-line resources and lessons.
- Walk through some littleBits introductory lessons, assembling projects, and completing coding exercises.
- Work with other teachers to plan for implementation and class projects.
- Enhance capacities for making and coding (no matter what your experience level may be).

If you'd like more information, please email Cathy Favo at [cfavo@rsd.k12.pa.us](mailto:cfavo@rsd.k12.pa.us).
