

ABC CREATE Finch Robot Training

Finch Robots

Thursday, August 9, 2018

Penn State New Kensington
Art Gallery
Eligible for ACT 48 credits

ALL teachers are welcome. All grade levels. All subject areas.

We recognize that grade levels do not necessarily equate to skill levels (of teachers or of students).

- 8:30 - 11:30 AM Snap! Level 1 - 3 (Likely a good fit for K- 4th grade)
- 11:30 AM - 12:30 PM Networking and Lunch
- 12:30 - 3:30 PM Snap! Level 4 and/or Scratch (Likely for 4th - 8th grade)

Participants can attend full or 1/2 day. Great opportunity for those with some experience to fill in gaps, to find out what comes before ... or after, and to learn with and from other educators.

Note:

Grade levels listed above may align in some school districts, but not all - just listed as possible alignment. No worries if it's not how it plays out for you or your school. It's the skill development that matters. (I'm pretty sure we've had high school kids learning with early levels of Snap! as a non-threatening starting point. Whatever works for you and yours works for us.)

Presented by Kelsey Derringer of Birdbrain Technologies.
